OBJECTIVE

I'm a Fullstack Developer with hands-on experience in building dynamic, scalable applications using React, Next.js, Express.js and MongoDB. With a Computer Science degree from BRAC University and a strong foundation in both frontend and backend technologies, I'm eager to grow into a more advanced role where I can solve real-world problems and build impactful software solutions.

EDUCATION

Bachelor of Computer Science, BRAC University

2018 - 2023

SKILLS

Language Skills	Javascript, Java, Dart, Html, CSS
Framework Skills	React, Next, Express, SpringBoot
Database Skills	MongoDB, SQL, Firebase
Soft Skills	Problem-Solving, Presentation Skills

EXPERIENCE

Fullstack Developer

August 2023 – Present

Vista Systech

As a Fullstack Developer at Vista Systech, I contributed to several production-ready applications across diverse industries. My responsibilities included building dynamic frontend interfaces with React, integrating **APIs**, and occasionally working on backend features. I also played a key role in projects within the BetterThat ecosystem, where I handled frontend development for multiple platforms and contributed to backend services involving **AI agents** and **Meta Graph API** integration.

Web Developer

May 2024 - August 2024

ANA-Soft

As a Web Developer Intern at ANA-Soft, I have worked extensively with ASP.NET to develop and maintain several dynamic websites, including the **UGC** Equivalence portal. My role involved both back-end and front-end development, focusing on enhancing functionality, performance, and user experience.

PROJECTS

Evocart – [Evocart](#)(Beta)

Developed subdomain-specific layout logic, implemented responsive UI updates and handled API integrations. Implemented AI agent functionality, integrated **Meta Graph API**, and exposed RESTful APIs for frontend usage.

AI Agent

Developed an **AI Agent** integrating OpenAI API to analyze product images from URLs, extracting or generating product names and crafting concise descriptions. This enhanced the user experience by automating product identification and information retrieval. ([Git](#))

Meta Post

Developed a **React** application integrating **Meta's Graph API**, enabling users to authenticate and seamlessly publish content to their Facebook Pages and associated Instagram accounts, thereby streamlining cross-platform social media management. ([Git](#))

SewingTex React Conversion – [SewingTex](#)

Converted a complete **HTML**-based website to a React SPA with integrated **APIs** for dynamic content rendering.

WhatsApp Bulk Messenger

Developed a fullstack messaging tool. Implemented logout and message history functionality, along with a responsive and clean UI design.

BetterThat Ecosystem Projects

Worked on multiple production-grade **React** applications under the BetterThat umbrella as a frontend developer. Responsibilities included building dynamic interfaces and full **API** integrations.

- [Auckland Rescue](#)

Physics Department, BUET – phy.buet.ac.bd

Enhanced parts of the departmental website by making static components dynamic, improving maintainability and UX.
